

Zhou Xiangcheng --- Flutter Development Engineer

Basic Information

Zhou Xiangcheng | Male | 10+ years of development experience | Bachelor's degree (Huanghuai University, Electronic Information Engineering)

Phone: 15201120927 Email: developer_zxc@126.com

Github/Portfolio: <https://pgzxc.github.io/resume/>

Job Intent

Employment Type: Full-time Desired Position: Flutter Development Engineer

Work Location: Beijing Desired Salary: 17-30K (negotiable)

Work Experience

2013.06 --- 2014.06 Quanta Shanghai Computer Manufacturing City Test Assistant Engineer

2015.04 --- 2015.10 Le Yi Kao (Beijing) Education Technology Co., Ltd. Android Development Engineer

2015.10 --- 2016.07 Time Internet Technology (Beijing) Co., Ltd. Android Development Engineer

2016.07 --- 2018.06 Tibet Yuanyu (Beijing) Network Technology Co., Ltd. Android Development Engineer

2018.07 --- 2022.04 Zhongke Hangtian (Beijing) Technology Co., Ltd. Full-stack Development Engineer

2022.06 --- 2024.12 Bess Changxiang Technology Co., Ltd. Full-stack Development Engineer

2024.12 --- Present Career Development and Technical Exploration | In-depth Practice of Hongmeng Ecosystem | AI-assisted Development

Technology Stack

- 1.Mobile (Mastered): Hongmeng, Android, iOS
- 2.Cross-platform (Mastered): Flutter, ReactNative, KMP, Tora, etc.
- 3.Mini Program Development (Familiar): WeChat Mini Program, uni-app
- 4.Web Front-end (Familiar): Frameworks (react/vue), UI libraries (element/Ant Design, etc.)
- 5.Backend Development (Beginner): Java (Company projects: mybatis + microservices + distributed)
- 6.Desktop Development (Beginner): WinForm (Company project: Elderly care project)
- 7.Development Methods (Familiar): Traditional Programming + AI-assisted Development

Professional Skills

- 1.Familiar with Flutter component system and lifecycle: StatelessWidget, StatefulWidget
- 2.Familiar with Flutter asynchronous and network: Future/Stream, async/await and Future, Dio/Retrofit, etc.
- 3.Familiar with Flutter local storage: SharedPreferences, SQLite/Drift, Hive/Isar
- 4.Familiar with Flutter state management: Provider, Bloc, Riverpod, GetX, MobX, Cubit
- 5.Familiar with Flutter underlying mechanisms: Three-tree rendering mechanism, UI drawing process, etc.
- 6.Understood native hybrid development and communication mechanisms: Flutter and native

hybrid, XXChannel communication

7.Familiar with Flutter routing management: Navigator 1.0/2.0, GoRouter, AutoRoute

8.Familiar with performance and multi-platform adaptation: Startup optimization and anti-white screen, performance optimization and tuning tools, multi-platform adaptation, overflow issues

Project Experience

Project Attribution: Personal Project

Project Name: SwiperFlutter (Private)

Project Address: <https://github.com/PGzxc/SwiperFlutter>

Software Support: Android+iOS

Development Tool: IDEA(2025.3.1)+Flutter(3.38.5)

Project Description: Cross-platform short video + developed independently based on Flutter framework

Graphic community application, one code multi-platform deployment; Realize video playback, image waterfall flow browsing and complete user interaction system.

Function Modules: Home, Album, Publish, Message, Me

Technical Highlights:

- 1.Architecture Design: Adopt MVVM architecture, decouple UI and business logic, improve code maintainability
- 2.State Management: Use Riverpod to manage global and page states, ensure state predictability and testability
- 3.Network and Data: Dio + Interceptor + Data Cache, combined with json_serializable automatic serialization
- 4.Video Playback: Based on video_player, supports auto-play, gesture control and lifecycle management
- 5.Image Optimization: Use cached_network_image to achieve image caching, improve list scrolling performance
- 6.Waterfall Flow Layout: Realize image waterfall flow display through flutter_staggered_grid_view
- 7.Screen Adaptation: Adopt responsive layout scheme to adapt to different screen sizes and resolutions

Project Attribution: Personal Project

Project Name: Flutter-wanandroid (Open Source)

Project Address: https://github.com/PGzxc/flutter_wanandroid

Software Support: Android+iOS

Development Tool: IDEA Community Edition 2022.1+Flutter(3.0.2)

Project Description: Flutter-WanAndroid is based on WanAndroid website open API

Developed open-source mobile terminal application, aiming to provide users with convenient article browsing, project classification, knowledge system and other functional experiences.

Function Modules: Home, Navigation, Project, Message, Me, Language, Theme

Technical Highlights:

- 1.Build development framework based onGetX+getWidget
- 2.Build network request based on GetX-GetConnect
- 3.Encapsulate network return results based on json_serializable+build_runner
- 4.Save user login results and language/theme settings based on shared_preference
- 5.Implement pull-down refresh and pull-up loading based on flutter_pulltorefresh
- 6.Implement preview effect display during network requests based on shimmer
- 7.Display web page effects based on webview-flutter
- 8.Cache list items based on KeepAliveWrapper to prevent multiple loading

9. Based on Google component `getWidget-badges`, display unread messages

10. Use `flutter_screenutil` for screen adaptation
