

Zhou Xiangcheng --- Front-end Development Engineer

Basic Information

Zhou Xiangcheng | Male | 10+ years of development experience | Bachelor's degree (Huanghuai University, Electronic Information Engineering)
Phone: 15201120927 Email: developer_zxc@126.com
Github/Portfolio: <https://pgzxc.github.io/resume/>

Job Intent

Employment Type: Full-time Desired Position: Front-end Development Engineer
Work Location: Beijing Desired Salary: 15-20K (negotiable)

Work Experience

2013.06 --- 2014.06 Quanta Shanghai Computer Manufacturing City Test Assistant Engineer
2015.04 --- 2015.10 Le Yi Kao (Beijing) Education Technology Co., Ltd. Android Development Engineer
2015.10 --- 2016.07 Time Internet Technology (Beijing) Co., Ltd. Android Development Engineer
2016.07 --- 2018.06 Tibet Yuanyu (Beijing) Network Technology Co., Ltd. Android Development Engineer
2018.07 --- 2022.04 Zhongke Hangtian (Beijing) Technology Co., Ltd. Full-stack Development Engineer
2022.06 --- 2024.12 Bess Changxiang Technology Co., Ltd. Full-stack Development Engineer
2024.12 --- Present Career Development and Technical Exploration | In-depth Practice of Hongmeng Ecosystem | AI-assisted Development

Technology Stack

- 1.Mobile (Mastered): Hongmeng, Android, iOS
- 2.Cross-platform (Mastered): Flutter, ReactNative, KMP, Tora, etc.
- 3.Mini Program Development (Familiar): WeChat Mini Program, uni-app
- 4.Web Front-end (Familiar): Frameworks (react/vue), UI libraries (element/Ant Design, etc.)
- 5.Backend Development (Beginner): Java (Company projects: mybatis + microservices + distributed)
- 6.Desktop Development (Beginner): WinForm (Company project: Elderly care project)
- 7.Development Methods (Familiar): Traditional Programming + AI-assisted Development

Professional Skills

- 1.Familiar with HTML5 and semantics: Semantic tags, audio and video, Canvas, WebSocket, LocalStorage, etc.
- 2.Familiar with CSS3 layout and style system: Flex/Grid layout, BFC, positioning mechanism and CSS priority, etc.
- 3.Familiar with JS core mechanisms: Closures, prototype chains, this binding, event models, asynchronous programming

4. Familiar with ES6+ new features and modularization system: Destructuring assignment, optional chaining, Proxy/Reflect, ESM modularization, etc.
5. Familiar with mainstream front-end frameworks: Vue2/Vue3 responsiveness, Hooks principles and Diff algorithms
6. Familiar with front-end engineering and build toolchain: Build tools and optimization strategies
7. Understood Node.js and full-stack frameworks: Backend frameworks (Express, Koa, NestJS, etc.)
8. Possess performance and cutting-edge technology application capabilities: First-screen optimization, virtual lists, lazy loading, understanding micro-frontends

Project Experience

Project Attribution: Hitachi China

Project Name: Hitachi Health Care System Ver1.0

Software Support: Web

Development Tool: Eclipse+Git

Project Description: This system is a gait analysis POC project. It collects image data of elderly people's walking and specified movements through imaging equipment, combined with motor ability assessment models, realizes movement visualization display and ability scoring, helps users understand and improve their own motor functions, and is widely applicable to smart elderly care and rehabilitation assistance scenarios.

Function Modules: Gait Analysis, Movement Analysis, Questionnaire Survey

Responsible Modules: Gait Analysis, Movement Analysis, Questionnaire Survey

Technical Highlights:

1. Built the overall project framework based on LigerUI\
2. Performed network requests and front-end and back-end interactions based on jQuery-ajax\
3. Drew gait analysis results and historical data charts based on Highcharts\
4. Quickly drew interfaces using jQuery components based on jQuery-UI
5. Performed form data validation based on jquery-validation
6. Operated Cookie cache data based on jQuery-Cookie
7. Realized serialization and deserialization of network request results based on json2.js-json
8. Solved scrolling event problems based on jquery.scrollstop

Project Attribution: Hitachi China

Project Name: Hitachi Smart Elderly Care Management System Ver2.0

Software Support: Web

Development Tool: IntelliJ+Git

Project Description: Hitachi Smart Elderly Care Management System is a complete upgrade version and complete revision of Ver1.0. The system is divided into administrator accounts and institution accounts. The administrator account is equivalent to a super user, can log in to institution accounts, and is used for institution management, app management, database management, etc. The institution account is used for user management, training projects, ranking, status preview, data analysis, etc.

Function Modules: Administrator Account, Institution Account

Technical Highlights:

1. Built the overall project framework based on the layui mainstream front-end framework\
2. Realized responsive layout and icons, styles, components, etc. based on bootstrap\
3. Drew test results and statistical analysis based on echarts\
4. Performed network requests and front-end and back-end interactions based on jQuery-ajax
5. Generated user QR codes based on qrcode
6. Face recognition library developed based on tracking-min.js and face-min.js
