

Zhou Xiangcheng --- HarmonyOS Development Engineer

Basic Information

Zhou Xiangcheng | Male | 10+ years of development experience | Bachelor's degree (Huanghuai University, Electronic Information Engineering)
Phone: 15201120927 Email: developer_zxc@126.com
Github/Portfolio: <https://pgzxc.github.io/resume/>

Job Intent

Employment Type: Full-time Desired Position: HarmonyOS Development Engineer (ArkTS/Cangjie)
Work Location: Beijing Desired Salary: 20-30K (negotiable)

Work Experience

2013.06 --- 2014.06 Quanta Shanghai Computer Manufacturing City Test Assistant Engineer
2015.04 --- 2015.10 Le Yi Kao (Beijing) Education Technology Co., Ltd. Android Development Engineer
2015.10 --- 2016.07 Time Internet Technology (Beijing) Co., Ltd. Android Development Engineer
2016.07 --- 2018.06 Tibet Yuanyu (Beijing) Network Technology Co., Ltd. Android Development Engineer
2018.07 --- 2022.04 Zhongke Hangtian (Beijing) Technology Co., Ltd. Full-stack Development Engineer
2022.06 --- 2024.12 Bess Changxiang Technology Co., Ltd. Full-stack Development Engineer
2024.12 --- Present Career Development and Technical Exploration | In-depth Practice of Hongmeng Ecosystem | AI-assisted Development

Technology Stack

- 1.Mobile (Mastered): Hongmeng, Android, iOS
- 2.Cross-platform (Mastered): Flutter, ReactNative, KMP, Tora, etc.
- 3.Mini Program Development (Familiar): WeChat Mini Program, uni-app
- 4.Web Front-end (Familiar): Frameworks (react/vue), UI libraries (element/Ant Design, etc.)
- 5.Backend Development (Beginner): Java (Company projects: mybatis + microservices + distributed)
- 6.Desktop Development (Beginner): WinForm (Company project: Elderly care project)
- 7.Development Methods (Familiar): Traditional Programming + AI-assisted Development

Professional Skills

- 1.Mastered Hongmeng multi-language development system: Java, arkts/ts/js, Cangjie
- 2.Understood Hongmeng model and lifecycle: Stage/FA model, lifecycle and callbacks
- 3.Familiar with Hongmeng decorators and state managers: v1 and v2 versions, \$ and \$\$, global state management, etc.
- 4.Familiar with arkts multithreading: TaskPool and Worker
- 5.Familiar with asynchronous and events: Asynchronous (Promise/async/await, etc.), event

mechanism (EventHub, component events)

6. Familiar with component bidirectional communication: @Prop/@Observed, @Link, @Provide/@Consume, Emitter/EventHub

8. Understood distributed and lightweight: Distributed (data/soft bus/api), lightweight (atomization/cards)

Project Experience

Project Attribution: Personal Project

Project Name: SwiperHM (Private) - Hongmeng Short Video Application

Project Address: <https://github.com/PGzxc/SwiperHM>

Software Support: Hongmeng Full Series

API Version: API Version 17

Development Language: ArkTS+ArkUI

Development Tool: DevEco Studio 5.0.5 Release

Project Description: Douyin and Xiaohongshu imitation Hongmeng project, Based on apiopen open interface, realized Douyin video sliding switching

Function Modules: Home, Album, Publish, Message, Me

Technical Highlights:

1. Built Xiaohongshu-style bottom navigation based on Flex+Builder+scale+animation\
2. Monitored data changes and UI synchronization based on V1 and V2 state management
3. Adapted screens and windows based on official tool WindowUtils
4. Custom components: @Builder decorator, @Component decorator\
5. Third-party libraries: axios (network requests), pulltorefresh (refresh/load more)\
6. Common components: WaterFlow (waterfall flow), Swiper (video sliding), Tabs (navigation bar), etc.

Project Attribution: Personal Project

Project Name: WanCJ (Open Source) -- Cangjie Sample Library Collection

Project Address: <https://github.com/PGzxc/WanCJ>

Software Support: Hongmeng Full Series

API Version: API Version 12

Development Language: Cangjie (.cj)

Development Tool: DevEco Studio NEXT Beta1+Node(18.18.2)

Project Contribution: HarmonyOS-Examples/WebviewMix

Project Description: This project is an open-source project that converts Hongmeng development language from ArkTS (.ets) to Cangjie (.cj), UI

Layout remains unchanged, logic is written in Cangjie, and on the basis of encapsulating network access modules, custom components, etc., quickly complete functional development

Function Modules: Home, Courses, Tools, My

Technical Highlights:

1. Built bottom navigation framework based on Tabs+TabContent\
2. Performed network requests based on ohos.net.http, encapsulated Get and Post requests
3. Serialization and deserialization of data classes
4. Constructed tool classes to convert JsonObject to Bean and String to JsonObject\
5. Obtained network data and updated status based on decorators such as @State and @Prop\
6. Created custom components based on @Builder decorator, extended existing components (methods) with extend, reduced code reuse
