

Zhou Xiangcheng --- Java Development Engineer

Basic Information

Zhou Xiangcheng | Male | 10+ years of development experience | Bachelor's degree (Huanghuai University, Electronic Information Engineering)

Phone: 15201120927 Email: developer_zxc@126.com

Github/Portfolio: <https://pgzxc.github.io/resume/>

Job Intent

Employment Type: Full-time Desired Position: Java Development Engineer

Work Location: Beijing Desired Salary: 15-25K (negotiable)

Work Experience

2013.06 --- 2014.06 Quanta Shanghai Computer Manufacturing City Test Assistant Engineer

2015.04 --- 2015.10 Le Yi Kao (Beijing) Education Technology Co., Ltd. Android Development Engineer

2015.10 --- 2016.07 Time Internet Technology (Beijing) Co., Ltd. Android Development Engineer

2016.07 --- 2018.06 Tibet Yuanyu (Beijing) Network Technology Co., Ltd. Android Development Engineer

2018.07 --- 2022.04 Zhongke Hangtian (Beijing) Technology Co., Ltd. Full-stack Development Engineer

2022.06 --- 2024.12 Bess Changxiang Technology Co., Ltd. Full-stack Development Engineer

2024.12 --- Present Career Development and Technical Exploration | In-depth Practice of Hongmeng Ecosystem | AI-assisted Development

Technology Stack

- 1.Mobile (Mastered): Hongmeng, Android, iOS
- 2.Cross-platform (Mastered): Flutter, ReactNative, KMP, Tora, etc.
- 3.Mini Program Development (Familiar): WeChat Mini Program, uni-app
- 4.Web Front-end (Familiar): Frameworks (react/vue), UI libraries (element/Ant Design, etc.)
- 5.Backend Development (Beginner): Java (Company projects: mybatis + microservices + distributed)
- 6.Desktop Development (Beginner): WinForm (Company project: Elderly care project)
- 7.Development Methods (Familiar): Traditional Programming + AI-assisted Development

Professional Skills

- 1.Proficient in Java basic grammar, collections, multi-threading, reflection and other core technologies
- 2.Familiar with JVM memory management, garbage collection mechanism and class loading principles
- 3.Master Spring, Spring Boot, MyBatis and other mainstream development frameworks
- 4.Proficient in using MySQL, Redis and other database and caching technologies, with SQL writing and optimization capabilities
- 5.Understood distributed architecture, mastered common middleware such as RabbitMQ, Kafka,

Nacos, Dubbo, etc.

6.Familiar with network programming, HTTP protocol and concurrent processing, mastered concurrent models such as thread pools and lock mechanisms

7.Proficient in using development tools such as Git, Maven, IDEA, and understood automated deployment processes such as Jenkins and Docker

8.Familiar with unit testing frameworks such as Junit, Mockito, and understood common Web security (XSS, CSRF, SQL injection) risks

Project Experience

Project Attribution: Hitachi R&D Center

Project Name: Calendar Smart Elderly Care Management System Ver1.0

Running Environment: Camera Collection+Win Storage+Linux POC

Development Tool: Eclipse+Navicat+Tomcat8.5

Project Description: This system is deployed on Linux platform. Windows+image collection camera constitutes a collection unit, and Linux

Poc system connects multiple collection units. Image equipment collects image information such as elderly people's walking and specified movements and stores them on Windows storage servers. Linux

POC system receives image data from Windows platform for analysis and displays results.

Function Modules: QR Code Scan Sign-in, Gait Analysis, Movement Analysis, Questionnaire Survey, etc.

Technical Highlights:

- 1.Backend uses MyBatis framework for development\
- 2.Frontend uses LigerUI to build page framework\
- 3.Java executes shell scripts through Runtime.exec to start and end camera collection\
- 4.shell script executes python program to control camera program
- 5.Draw gait analysis structure and historical data charts with HightCharts

Project Attribution: Hitachi R&D Center

Project Name: Hitachi Smart Elderly Care Management System Ver2.0

Running Environment: Camera Collection+Win Storage+Linux POC

Development Tool: IntelliJ IDEA+Navicat+Tomcat8.5 +SVN

Project Description: This system is a complete upgrade and revision of version Ver1.0. With the increase of elderly care institutions, applications, and equipment, administrator accounts and institution accounts are newly added. Administrator accounts are equivalent to super users, can log in to institution accounts, and are used for institution management, app management, database management, etc.; institution accounts are used for user management, training projects, ranking, status preview, data analysis, etc.

Function Modules: Administrator Module, Institution Module

Technical Highlights:

- 1.Use Spring + SpringMVC + MyBatis to build the project\
- 2.Use MyCat distributed database to handle multi-tenant database operations\
- 3.Use Redis to cache some key data information to increase data query efficiency\
- 4.Use Maven for package dependency management
- 5.Use swagger-ui to automatically generate interface documents
