

Zhou Xiangcheng --- KMP Development Engineer

##Basic Information

Zhou Xiangcheng | Male | 10+ years of development experience | Bachelor's degree (Huanghuai University, Electronic Information Engineering)

Phone: 15201120927 Email: developer_zxc@126.com

Github/Portfolio: <https://pgzxc.github.io/resume/>

Job Intent

Employment Type: Full-time Desired Position: KMP Development Engineer

Work Location: Beijing Desired Salary: 17-30K (negotiable)

Work Experience

2013.06 --- 2014.06 Quanta Shanghai Computer Manufacturing City Test Assistant Engineer

2015.04 --- 2015.10 Le Yi Kao (Beijing) Education Technology Co., Ltd. Android Development Engineer

2015.10 --- 2016.07 Time Internet Technology (Beijing) Co., Ltd. Android Development Engineer

2016.07 --- 2018.06 Tibet Yuanyu (Beijing) Network Technology Co., Ltd. Android Development Engineer

2018.07 --- 2022.04 Zhongke Hangtian (Beijing) Technology Co., Ltd. Full-stack Development Engineer

2022.06 --- 2024.12 Bess Changxiang Technology Co., Ltd. Full-stack Development Engineer

2024.12 --- Present Career Development and Technical Exploration | In-depth Practice of Hongmeng Ecosystem | AI-assisted Development

Technology Stack

- 1.Mobile (Mastered): Hongmeng, Android, iOS
- 2.Cross-platform (Mastered): Flutter, ReactNative, KMP, Tora, etc.
- 3.Mini Program Development (Familiar): WeChat Mini Program, uni-app
- 4.Web Front-end (Familiar): Frameworks (react/vue), UI libraries (element/Ant Design, etc.)
- 5.Backend Development (Beginner): Java (Company projects: mybatis + microservices + distributed)
- 6.Desktop Development (Beginner): WinForm (Company project: Elderly care project)
- 7.Development Methods (Familiar): Traditional Programming + AI-assisted Development

Professional Skills

- 1.Familiar with Kotlin language: Type inference, null safety, extension functions, coroutines, data classes/sealed classes, etc.
- 2.Familiar with KMP platform specialization: expect/actual mechanism, commonMain/androidMain/iosMain module division
- 3.Familiar with KMP architecture: shared module MVVM architecture, ViewModel/Repository encapsulation
- 4.Familiar with KMP build and configuration: kotlin{targets {}}, multi-platform dependencies, Gradle DSL

5. Familiar with KMP data layer: Network layer (Ktor), database (SQLDelight), storage layer (KStore), etc.
6. Familiar with KMP dependency injection system: Hilt (Android side), Koin (multi-platform implementation)
7. Understood KMP compilation and build process: Build process, compilation products (Framework/klib), XCFramework
8. Understood KMP and native interoperability: Android/Ios calling shared module, bridging Swift and Kotlin data types

Project Experience

Project Attribution: Personal Project

Project Name: SwiperKMP (Private)

Software Support: Cross-platform (Android, iOS, JVM, Web)

Project Address: <https://github.com/PGzxc/SwiperKMP>

Development Tool: IDEA(2025.3.1)+ Gradle(8.14.3)+AS+Xcode

Project Description: Independently developed cross-platform short video + album browsing application, using Compose

Multiplatform to realize modern declarative UI that can be written once and run on multiple platforms; Product form targets Douyin/Xiaohongshu short videos and graphic communities, providing smooth video/image slide browsing, category viewing and full-screen immersive interactive experience, supporting multiple platforms.

Function Modules: Home, Album, Publish, Message, Me, etc.

Technical Highlights:

1. Architecture Design: Realize code sharing based on Kotlin Multiplatform\
2. UI Framework: Use Compose Multiplatform to build declarative UI\
3. State Management: Compose State + LaunchedEffect + ViewModel manage cross-platform page state\
4. Network and Data: Ktor + Kotlinx Serialization + Coroutines efficient asynchronous network requests
5. Video Playback: Cross-platform video playback, Android uses ExoPlayer, JVM uses JavaFX
6. Image Processing: Coil realizes cross-platform efficient caching and loading, optimizing long list scrolling performance
7. Gesture Interaction: Based on Compose gesture API to realize cross-platform consistent image zooming and other interactions
8. Screen Adaptation: Responsive layout + platform-specific WindowInsets processing to adapt to various screen sizes
9. Build and Dependencies: Gradle Kotlin DSL + VersionCatalog unified management of cross-platform dependencies and versions

Project Attribution: Personal Project

Project Name: WanAndroidKMP (Open Source)

Software Support: Android+iOS+Desk(Mac/Windows/Linux)

Project Address: <https://github.com/PGzxc/WanAndroidKMP>

Development Tool: Android Studio+Java(17)+Gradle(8.0.2)+Kotlin(1.9.0)

Project Description: This project is developed based on WanAndroid API, using Compose Multiplatform

To realize cross-platform interface construction, supporting core functions such as user login, registration, article browsing, projects, navigation and messages. Adapt to multiple platforms.

Function Modules: Home, Navigation, Project, Message, Me, Settings, etc.

Technical Highlights:

1. Create project based on template `compose-multiplatform-template\`
2. Build bottom navigation framework based on `NavigationBar\`
3. Network part: `ktor-core` core library + `ktor-serialization-kotlinx-json` serialization\
4. Realize interface navigation based on `Navigator`
5. Display and load network images based on `kamel-image`
6. Realize cross-platform file and data storage based on `kstore-file` and `kstore`
7. Display Icons icons based on `compose.materialIconsExtended`
