

Zhou Xiangcheng --- Mini Program Development Engineer

Basic Information

Zhou Xiangcheng | Male | 10+ years of development experience | Bachelor's degree (Huanghuai University, Electronic Information Engineering)
Phone: 15201120927 Email: developer_zxc@126.com
Github/Portfolio: <https://pgzxc.github.io/resume/>

Job Intent

Employment Type: Full-time Desired Position: Mini Program Development Engineer
Work Location: Beijing Desired Salary: 15-25K (negotiable)

Work Experience

2013.06 --- 2014.06 Quanta Shanghai Computer Manufacturing City Test Assistant Engineer
2015.04 --- 2015.10 Le Yi Kao (Beijing) Education Technology Co., Ltd. Android Development Engineer
2015.10 --- 2016.07 Time Internet Technology (Beijing) Co., Ltd. Android Development Engineer
2016.07 --- 2018.06 Tibet Yuanyu (Beijing) Network Technology Co., Ltd. Android Development Engineer
2018.07 --- 2022.04 Zhongke Hangtian (Beijing) Technology Co., Ltd. Full-stack Development Engineer
2022.06 --- 2024.12 Bess Changxiang Technology Co., Ltd. Full-stack Development Engineer
2024.12 --- Present Career Development and Technical Exploration | In-depth Practice of Hongmeng Ecosystem | AI-assisted Development

Technology Stack

- 1.Mobile (Mastered): Hongmeng, Android, iOS
- 2.Cross-platform (Mastered): Flutter, ReactNative, KMP, Tora, etc.
- 3.Mini Program Development (Familiar): WeChat Mini Program, uni-app
- 4.Web Front-end (Familiar): Frameworks (react/vue), UI libraries (element/Ant Design, etc.)
- 5.Backend Development (Beginner): Java (Company projects: mybatis + microservices + distributed)
- 6.Desktop Development (Beginner): WinForm (Company project: Elderly care project)
- 7.Development Methods (Familiar): Traditional Programming + AI-assisted Development

Professional Skills

- 1.Familiar with front-end Web development technologies such as HTML, CSS, and box layout models
- 2.Proficient in JavaScript (ES6+), understanding core concepts such as closures, prototype chains, and asynchronous programming
- 3.Familiar with using mainstream front-end frameworks and libraries, such as React, Vue, Angular, Bootstrap, etc.

4. Familiar with state management solutions, such as Redux, MobX, Vuex
5. Familiar with packaging tools (Webpack, Vite, Rollup) and build optimization
6. Familiar with CSS preprocessors (Sass, Less) and other solutions
7. Understood front-end security knowledge, such as XSS, CSRF, and protection measures
8. Familiar with WeChat Mini Program development, familiar with uni-app development

Project Experience

Project Attribution: Hitachi China

Project Name: Hitachi Health (WeChat Mini Program)

Software Support: WeChat Mini Program

Development Tool: WeChat Developer Tool 1.05+Git

Project Description: Hitachi Health Mini Program is a WeChat Mini Program developed by Hitachi Elderly Care Project Team by partially integrating existing projects (gait + brain training + sleep health, etc.). Without installing an app, it realizes functions that need to be completed by app and hardware through the mini program.

Function Modules: Login and Registration Module, Home Page, Chronic Disease Management, Cognitive Management, Fall Management, Daily Management, etc.

Responsible Modules: Cognitive Management, Fall Management, and Front-end Games, etc.

Technical Highlights:

1. Built mini program layout pages based on Flex+css\
2. Built template components based on template for repeated use in pages\
3. Draw video recording countdown animation using canvas\
4. Process data interaction between mini programs and webview based on JS-SDK
5. Mini program dynamic permission handling (geolocation, video recording, photo taking)
6. Encapsulate network interface requests and data storage reading

Project Attribution: Personal Project

Project Name: wanandroid_uni_app (Open Source)

Project Address: https://github.com/PGzxc/wanandroid_uni_app

Software Support: H5+WeChat Mini Program+Other Mini Programs

Development Tool: HBuilder X+WeChat Developer Tool+Vue2.x

Project Description: This project is built using uni-app based on WanAndroid open-source API. It implements user login and registration, article browsing, project display, navigation viewing, message notification, and other functions, supporting multi-end deployment.

Function Modules: Home Page, Navigation, Projects, Messages, My, etc.

Technical Highlights:

1. Use uni-ui component library to build page layout and interactive interface\
2. Encapsulate network requests based on uni.request\
3. Based on uni-api-EventChannel, monitor inter-page event communication
4. Realize page jumps and navigation control through routing APIs such as uni.navigateTo, redirectTo
5. Use uni.setStorage/uni.getStorage for local data caching\
6. Create Vue components for repeated use in pages
