

Zhou Xiangcheng --- ReactNative Development Engineer

Basic Information

Zhou Xiangcheng | Male | 10+ years of development experience | Bachelor's degree (Huanghuai University, Electronic Information Engineering)
Phone: 15201120927 Email: developer_zxc@126.com
Github/Portfolio: <https://pgzxc.github.io/resume/>

Job Intent

Employment Type: Full-time Desired Position: RN Development Engineer
Work Location: Beijing Desired Salary: 17-30K (negotiable)

Work Experience

2013.06 --- 2014.06 Quanta Shanghai Computer Manufacturing City Test Assistant Engineer
2015.04 --- 2015.10 Le Yi Kao (Beijing) Education Technology Co., Ltd. Android Development Engineer
2015.10 --- 2016.07 Time Internet Technology (Beijing) Co., Ltd. Android Development Engineer
2016.07 --- 2018.06 Tibet Yuanyu (Beijing) Network Technology Co., Ltd. Android Development Engineer
2018.07 --- 2022.04 Zhongke Hangtian (Beijing) Technology Co., Ltd. Full-stack Development Engineer
2022.06 --- 2024.12 Bess Changxiang Technology Co., Ltd. Full-stack Development Engineer
2024.12 --- Present Career Development and Technical Exploration | In-depth Practice of Hongmeng Ecosystem | AI-assisted Development

Technology Stack

- 1.Mobile (Mastered): Hongmeng, Android, iOS
- 2.Cross-platform (Mastered): Flutter, ReactNative, KMP, Tora, etc.
- 3.Mini Program Development (Familiar): WeChat Mini Program, uni-app
- 4.Web Front-end (Familiar): Frameworks (react/vue), UI libraries (element/Ant Design, etc.)
- 5.Backend Development (Beginner): Java (Company projects: mybatis + microservices + distributed)
- 6.Desktop Development (Beginner): WinForm (Company project: Elderly care project)
- 7.Development Methods (Familiar): Traditional Programming + AI-assisted Development

Professional Skills

- 1.Familiar with front-end basics: html/css/js, es6, ts/jsx, react, vue, etc.
- 2.Familiar with RN basics: Function/class components, Props/State, component encapsulation, Hooks, lifecycle
- 3.Familiar with RN state management: Redux, MobX, Zustand, Recoil, etc.
- 4.Familiar with RN data storage: AsyncStorage, MMKV, Realm, SQLite, WatermelonDB
- 5.Understood RN rendering principles: Virtual DOM diff algorithm, Yoga layout engine, Bridge

communication mechanism and new architecture

6. Familiar with RN component communication: Parent to child (Props), child to parent (callback function), cross-level (state management)

7. Familiar with common RN libraries: UI libraries (NativeBase/RN Elements), cross-platform UI (Ant Design)

8. Understood native extension and communication capabilities: Native access (Bluetooth/location/push), native communication (TurboModules/JSI)

Project Experience

Project Attribution: Personal Project

Project Name: SwiperRN (Private)

Project Address: <https://github.com/PGzxc/SwiperRN>

Software Support: Android+iOS

Development Tool: VSCode+Node(25.2.1)+react-native(0.81.5)+Expo(54)

Project Description: SwiperRN is a high-fidelity Douyin +

Xiaohongshu cross-platform short video & graphic community application, developed based on React Native + Expo

ecosystem, combined with api.apiopen.top

Free open interface to achieve full-screen video vertical sliding, image note waterfall flow, dynamic publishing, message notification and other complete social experiences. Supports iOS, Android, Web three platforms truly write once run anywhere.

Function Modules: Home, Album, Publish, Message, Me

Technical Highlights:

1. Custom Components: BottomAppBar center convex button and dynamic zoom effect\
2. Network Requests: Encapsulate ApiService (fetch/axios) to unify network request management\
3. Routing and Navigation: Implement file system routing system based on Expo Router\
4. Gesture Interaction: React Native Gesture Handler implements slide switching
5. Animation Effects: React Native Animated and Reanimated high-performance animations
6. Adaptation Solution: SafeAreaContext and Dimensions API responsive layout
7. Video Playback: expo-av + FlatList implements slide playback, preload next video
8. Build and Release: EAS Build multi-environment application packaging and release

Project Attribution: Personal Project

Project Name: WanAndroidRN (Open Source)

Project Address: <https://github.com/PGzxc/WanAndroidRN>

Software Support: Android+iOS

Development Tool: IntelliJ IDEA+react-native(0.72.6)+Node(18.18.2)+Expo(49)

Project Description: This project is a React built based on WanAndroid website open API Native open source App. With Expo Go development tools, paired with \@ant-design/react-native Ant Financial UI library to achieve cross-platform support for Android and iOS systems, making it convenient for users to access the website.

Function Modules: Home, Navigation, Project, Message, Me, etc.

Technical Highlights:

1. Use React Navigation to build bottom navigation framework, achieve smooth page switching\
2. Adopt Fetch API for network requests, use Promise to simplify asynchronous flow\
3. Use React Hooks (useEffect + useState) to achieve data fetching and state updates\
4. Design highly reusable custom components to improve code maintainability and development efficiency
5. Implement carousel effect based on ant-design/react-native-Carousel
6. Implement tab page switching based on ant-design/react-native-Tabs
